Performance analysis of TAGUCHI for benchmark functions: Rosenbrock's and Rastrigin's

R. Battiti

Abstract

The aim of the project is to analyze the performances Taguchi’s method when dealing with benchmark functions.
In particular, this project will analyze the performances of both the algorithms for:
Rastrigin's and Rosenbrock's Functions

Reference Bibliography: Evolutionary Optimization [1]-[53].

This report is submitted in partial fulfillment of the degree of the course “OTT”.

Supervisors: Prof. A. Massa, Dr. M. Salucci.
